No matter where you are in life, we've got a plan designed to fit your health coverage needs, as well as your budget.

Why do you need health care coverage?

These days, an average stay in the hospital can cost more than \$20,000.* The financial risk you take without health coverage just isn't worth it. Not only does health care coverage help you stay healthy, it also gives you added security, because you know you're protected against the high cost of unexpected medical bills.

* Based on 2008 weighted national estimates from HCUP National Inpatient Sample (NIS), Agency for Healthcare Research and Quality (AHRQ), based on data collected by Individual states and provided to AHRQ by the states. (Average stay of 3.8 days; average cost to uninsured of \$22,512.)

Some definitions so we're all on the same page

Network Discounts: With Anthem Blue Cross, you have access to one of the largest provider networks in the state. These network (or participating) providers have agreed to accept lower costs for their covered services to Anthem members — similar to volume discounts. These negotiated costs help reduce the overall cost of covered medical services, including your share of those costs.

This is true whether you are paying the entire cost for covered services (such as while you are meeting your deductible), or whether we are sharing the cost. With over 80,000 PPO doctors and nearly 315 hospitals, chances are your provider already participates. Just visit a network provider to take advantage of the savings.

With our PPO plans, you can always choose to receive services outside the network, but your share of the cost will be greater.

Cost-Sharing: The costs of medical care today can be staggering. Health care coverage from Anthem can help protect you against these high costs. With most health care coverage, you pay a monthly premium, then you share some of the cost of covered medical care with the company that provides your health care coverage. The level of cost-sharing you choose directly impacts your premium amount. The more you are willing to share in the cost, the lower your premium. With Anthem, you can choose your level of protection and the level of cost-sharing that works best for your health care needs and budget.

Deductible is the amount you have to pay each calendar year for covered services before your health care plan starts paying. For some services, the plan will even begin to pay before the deductible is met. Usually, the higher a plan's deductible, the lower the premium. In some cases, you may also have a separate deductible for certain services such as prescription drugs.

Coinsurance is the percentage of the cost of covered services that you will be responsible for, after your annual deductible is met. With some plans, you have a choice of coinsurance levels. For some services, your coinsurance will be 0%. Much like your deductible, selecting a higher coinsurance typically lowers your monthly premium because it increases your share of the cost.

Copayment is a specific dollar amount you have to pay for certain covered services.

Out-Of-Pocket Maximum is the most that you would pay in a calendar year for deductible and coinsurance for in-network covered services. Once you reach this maximum, the plan pays at 100% for most services for the rest of the calendar year.

Prescription Drugs are medications that must be authorized for use by your doctor. Anthem offers varying levels of prescription drug coverage. Depending on the plan, you may have coverage for generic drugs or generic and brand name drugs.

Generic Drugs are prescription drugs that typically have been in use for some time and can be manufactured and distributed by numerous companies, so their cost is usually much lower. Generic drugs must, by law, contain the same active ingredients as their brand name equivalent and have the same clinical benefit.

Brand Name Drugs are prescription drugs that are manufactured and marketed under a registered name. They are usually patented and may be exclusively offered by certain manufacturers.

Specialty Drugs are typically high cost, scientifically engineered drugs used to treat complex, chronic conditions. They require special handling and usually must be shipped directly to the user.

Formulary is a list of prescription drugs our health care plans cover. They include generic, brand name, and specialty drugs that have been rigorously reviewed and selected by a committee of practicing doctors and clinical pharmacists for their quality and effectiveness. We've negotiated lower prices on these formulary drugs, so you'll save when your doctor prescribes medication from our formularies. There can be different formularies for different health care plans.

Save money by using our dental network

As a Dental Blue member, you can see *any* dentist you want; however, you do have the potential for lower costs when you choose a dentist in the Dental Blue 100 network. This is because network dentists have agreed to accept our negotiated rates for services they provide to you. If you choose to go to a provider outside of the Dental Blue 100 network, you can be billed the difference between our network negotiated rates and what your chosen dentist wishes to charge. But, with more than 20,000 California providers and provider locations in our Dental Blue 100 network, it's likely your dentist is part of our network!

Plus, network dentists have agreed to pass along our negotiated rates on covered services to you during waiting periods, if you exceed your annual maximum benefit, or if you exceed frequency limitations allowed for a covered service. For example, both Dental Blue Basic and Dental Blue Enhanced provide coverage for two cleanings per year. Members who get a third cleaning would receive our negotiated rates for that service.

Waiting Periods

Utilization Management and Case Management

Our Utilization Management (UM) services offer a structured program that monitors and evaluates member care and services. The UM clinical team, which is made up of health care professionals who hold active professional licenses and certificates, perform the prior authorization, concurrent and retrospective review processes explained below. The UM team follows criteria to assist in decisions regarding requests for health care and other covered benefits, and complies with specific timeframes to ensure requests are handled in a timely manner. Our case management services help you to better understand and manage your health conditions.

Prospective Review / Pre-Admission Review

Prospective review (also known as pre-service or pre-admission review) is the process of reviewing a request for a medical procedure or service before it takes place. The review occurs to ensure that:

1) the procedure is medically necessary and 2) the procedure meets your health care plan's specific guidelines prior to being performed.

Requests for prospective review may include but are not limited to:

- inpatient hospitalizations
- outpatient procedures
- diagnostic procedures
- therapy services
- durable medical equipment

Prospective review is required for all elective inpatient admissions and certain outpatient services. The review process evaluates medical necessity and the best level of care and assigns expected length of stay if needed.

Concurrent Review

Concurrent review is an ongoing evaluation of a member's hospital stay, as well as ongoing extensions of services that may be needed (such as acute care facilities, skilled nursing facilities, acute rehabilitation facilities, and home health care services). The review includes physicians, member-assigned health care professionals (or member authorized representative) and takes place by telephone, electronically and/or onsite.

Concurrent review uses pre-set decision criteria in order to approve medical care (deemed to be medically necessary) and assign the right level of care for continued medical treatment. Review decisions are based on the medical information obtained at the time of the review. Concurrent review also helps to coordinate care with behavioral health programs.

Retrospective Review

The retrospective review process consists of obtaining information to determine medical necessity as it relates to services provided without approval or notice ahead of time (e.g. without pre-service notification). Relevant clinical information is required for the retrospective review process. Review decisions are based only on the medical information the doctor or other provider had at the time the member received medical care.

Case Management

Case managers are licensed healthcare professionals who work with you to help you understand your benefits and support your health care needs. The case manager works with you and your doctor to help you better understand and manage your health conditions.
